

## **Update 3/24/19**

Due to the COVID-19 pandemic, all remaining on-site data validation centers will need to migrate to a remote visit to receive validation services and earn validation points. These few centers have been notified and provided a copy of the MTQIP Remote Access Agreement to sign and return.

## **Implementation**

MTQIP follows the below validation scheme for monitoring and improving collaborative data quality. Centers will be selected and notified in January for the preceding year.

## **Center selection process**

1. All centers that have not been validated the previous year are validated.
2. The 8 centers with the highest error rates for the collaborative are validated.
3. The remaining centers are chosen at random until a total of 25 centers for the year.
